

NAVBLUE launches Nsight, the brand new platform for flight data analysis

Toulouse, France, 6 April 2023

- **A cloud-based solution and a single platform for flight data analysis**
- **Already 30+ airlines to benefit from the power of Nsight this year**

NAVBLUE has launched Nsight, a new single platform to collect, decode and analyze flight data, monitor trends, create safety analyses and dashboards. Nsight was designed and developed by our expanded team of Flight Ops, Training and Safety Experts.

Over 30+ airlines all over the world have already signed for Nsight. Customers include *Air Senegal, Berniq Airways, Congo Airways, Libyan Airlines, Nouvelair (Africa), Jetair Caribbean (Americas), AirSial, Bamboo Airways, Bhutan Airlines, FitsAir, Himalaya Airlines, Nepal Airlines, Vietravel Airlines (Asia), Air Malta, Czech Airlines, Fly Air41 Airways, FlyOne, SKY express, Sundair, Tus Airways (Europe), Middle East Airlines, Israil Airlines and Nesma Airlines (Middle East)*.

Nsight relies on a brand new Flight Data Analysis (FDA) core, a measurement-based engine connected to multiple data sources. Through the combination of measurements, airport and weather information, Nsight is more powerful at providing quantified elements that allow airlines to enhance their risk assessment.

Nsight is a cloud-based solution, compatible with multiple aircraft types, not limited to Airbus. Thanks to our comprehensive set of solutions, Nsight airline customers can benefit from access to the tool for internal FDA programmes, externalize as an FDA service, and have access to our training and expertise.

With Nsight, airlines will benefit from many advantages:

- **Flexibility:** Nsight enables multiple workflows for the Flight Data Analysts' daily work;
- **Integration:** data collection, decoding and analysis in the same place, with the possibility to create analyses and dashboards;

- **Accuracy:** powerful measurement and event algorithms for a more precise evaluation of the risk exposure;
- **Capability:** high-speed flight data processing capability;
- **Expertise:** support of the development of aircraft related algorithms, wide portfolio of trainings, unique and dedicated FDA Management Service.

Marc LEMEILLEUR, CEO of NAVBLUE, says: *“Nsight leverages several years of combined expertise to create a truly modern tool for the Flight Data Analysis market. We are grateful to the airlines who joined us in this journey and look forward to the future we will create together.”*

About NAVBLUE: NAVBLUE is a leading services company, wholly owned by Airbus, dedicated to Flight Operations & Air Traffic Management Solutions and services for airlines, airports and Air Navigation Service Providers (ANSPs), on the ground and onboard. NAVBLUE combines aircraft manufacturer expertise, flight operations know-how and agile development to enhance operational efficiency, optimize resources and increase productivity, for a safe and sustainable aviation.

NAVBLUE delivers a reliable, optimum and customized user experience to more than 500 customers worldwide, in a range of areas, including digital cockpit operations, Operations Control Centre (OCC) systems, Flight Ops Engineering, Performance Based Navigation (PBN) and Air Traffic Management (ATM).

NAVBLUE employs 465 employees spread across the world, with offices in Canada, France, Poland, Singapore, Sweden, Thailand, UK and US and representatives in several other countries across the globe.
