

flyadeal signs for NAVBLUE's fully integrated OCC and EFB suite

Toulouse, France, 25 April 2023

Suite includes *Mission+*, *N-Flight Planning*, *N-Tracking*, *N-Ops & Crew* and *Navigation+* 27+ Airbus aircraft to be equipped

flyadeal, one of the youngest and fastest growing low-cost airlines in the Kingdom of Saudi Arabia and Middle East has chosen NAVBLUE Operations Control Centre (OCC) suite and Electronic Flight Bag (EFB) applications for its all-Airbus aircraft fleet, to optimize its operations and streamline its operational workflows, creating more added-value.

In addition to *Mission+*, NAVBLUE's Electronic Flight Assistant, flyadeal has selected the OCC suite including *N-Flight Planning*, *N-Tracking* and *N-Ops & Crew*, as well as *Navigation+*, and will benefit from a fully integrated and enhanced user experience.

The newly implemented NAVBLUE suite will enable complete, seamless, end to end connectivity from OCC to aircraft, taking advantage of onboard FOMAX Aircraft Interface Device to allow real time connection to avionics parameters. The NAVBLUE ecosystem allows automated transition of data from ground to air and return, maximising operational flow while minimising workload, bringing truly cutting edge technology to the airline.

- *Mission+*, the Electronic Flight Assistant, gathers all the information pilots need in one single application on a globe-centric display. *Mission+* is a true flight assistant, which reduces pilot workload and streamlines the flow of information between ground and onboard systems. It includes an electronic flight folder for mission management, navigation charts and airport moving map, weather information, and is integrated with Flysmart+ for aircraft performance calculations, documentation and checklists. *Mission+* will support flyadeal pilots in all flight phases from preparation to closure;
- *N-Flight Planning* will help the airline optimize on fuel, time, and cost to meet operational needs while ensuring overall safety and compliance;
- *N-Tracking* will offer flight situational awareness, with aircraft position reports and alerting;
- *N-Ops & Crew* will empower flyadeal with the ability to plan and distribute their network schedules, maintain full operations control with configurable operating rules, as well as manage and optimize crew schedule planning, day-of-ops, crew control, crew training and qualifications, and crew mobile access all within one single solution;

Reach for the skies

- *Navigation+* is part of the NAVBLUE Aeronautical Data Portfolio that delivers reliable and comprehensive aeronautical information to operate, support the avionics safety functions, and increase situational awareness. flyadeal will use *Navigation+* as Navigation Database for their FMS (Flight Management System).

flyadeal is the first airline in Saudi Arabia to benefit from these managed-by-exception, highly automated and integrated flight operations solutions.

Marc LEMEILLEUR, CEO of NAVBLUE, says: *“With this complete suite, flyadeal will be able to enhance its operational workflow, thanks to more automation and much less manual work for the teams, providing the tools to support the expected fleet growth planned over the coming years. NAVBLUE is proud to partner with flyadeal with this solution suite”.*

Con Korfiatis, CEO of flyadeal, adds: *“Thanks to this fully integrated suite, our pilots will benefit from the latest technology in terms of OCC and EFB, taking our operations to the next level. NAVBLUE’s tailored solution will help streamline both our cockpit and ground operations, thus enhancing our pilot experience and creating more added value for our company”.*

Originally a domestic carrier, flyadeal, launched 5 years ago in Jeddah, is now growing and operating international flights to the Gulf Cooperation Council (GCC) / Middle East and further afield (Istanbul, Georgia). The current fleet of 27 aircraft should increase to 60 in the coming years.

About NAVBLUE: NAVBLUE is a leading services company, wholly owned by Airbus, dedicated to Flight Operations & Air Traffic Management Solutions and services for airlines, airports and Air Navigation Service Providers (ANSPs), on the ground and onboard. NAVBLUE combines aircraft manufacturer expertise, flight operations know-how and agile development to enhance operational efficiency, optimize resources and increase productivity, for a safe and sustainable aviation.

NAVBLUE delivers a reliable, optimum and customized user experience to more than 500 customers worldwide, in a range of areas, including digital cockpit operations, Operations Control Centre (OCC) systems, Flight Ops Engineering, Performance Based Navigation (PBN) and Air Traffic Management (ATM).

NAVBLUE employs 500 employees spread across the world, with offices in Canada, France, Poland, Singapore, Sweden, Thailand, UK and US and representatives in several other countries across the globe.
